Experience

creatgenius | nigeria, Delta **JavaScript Developer**

Work Experience

CreatGenius - MERN Developer

June 2023 - Present

Built Awesome Websites: I created cool and interactive websites using React, making sure they look great and are easy to use.

Backend Magic: I used Node.js and Express to make sure everything works smoothly behind the scenes, kind of like being the wizard controlling the magic!

Handled Data: I worked with MongoDB to store and organize all the important data, making sure everything is in the right place and easy to find.

Fixed Bugs: Whenever there were problems, I found and fixed them, making sure the website runs perfectly.

Teamwork: I worked with a super cool team of other developers and designers, sharing ideas and making the best websites ever.

Learned New Things: I always kept learning about the latest tools and tricks to make our websites even better.

Skills

MongoDB, JavaScript, Express.js, Unit Testing, Cloud Computing, devops, ReactJS, React Native, GitHub, typescript

Education

Delta state polytechnic ozoro
chemical engineering | 06/2018
Diploma in Chemical Engineering

Problem-Solving Skills: In my chemical engineering classes, I learned how to solve tricky problems, like figuring out the best way to mix chemicals. This helps me fix bugs and create smooth-running websites as a MERN Developer.

Attention to Detail: Working with chemicals taught me to be super careful and pay attention to every tiny detail. This is great for writing clean, error-free code.

Teamwork: I did lots of group projects in school, working with other students to build and test things. Now, I work really well with my team at CreatGenius, sharing ideas and building awesome websites together.

Logical Thinking: Engineering taught me to think logically and plan things step-by-step. This helps me design and build well-organized web applications.

Continuous Learning: In chemical engineering, I had to keep learning new theories and techniques. Now, I always stay updated with the latest web development tools and trends.

My diploma in chemical engineering gave me valuable skills that make me a better MERN Developer, helping me create amazing websites and solve problems efficiently!
